THE PROJECT

Multiple Web & Platform Dev for Influencer Marketing Agency

Custom Software Development, Web Development

Project length

000 to $199,999

May 2021 - Ongoing

Project summary:

ADCI Solutions supported an influencer marketing agency in its multiple web development projects. The team created the sites using React.js and a headless CMS. They are now developing a complex platform.

THE REVIEW

"They produce fantastic results and I have direct communication with all members of the team."

MAR 25, 2021

5.0 ★★★★★

Quality: 5.0
Schedule: 5.0
Cost: 5.0
Willing to refer: 5.0

Feedback summary:

Thanks to ADCI Solutions' work, all projects were delivered successfully, within budget, and always at a high level of quality meeting the client's expectations. The team communicates thoroughly and manages the projects through project management tools.

RESULTS & FEEDBACK

Can you share any measurable outcomes of the project or general feedback about the deliverables?

All projects were delivered successfully, within budget and always to the high standard I expect.

Describe their project management style, including communication tools and timelines.

We manage projects in Redmine and communication is thorough each week

What did you find most impressive or unique about this company?

They produce fantastic results and I have direct communication with all members of the team.

Are there any areas for improvement or something they could have done differently?

Potentially timescales on some work, but I accept some delays because of the level of service and quality I recieve.

RESULTS & FEEDBACK
Can you share any measurable outcomes of the project or general feedback about the deliverables?
ADCI has consistently been able to move the larger and more technical rocks on our projects, addressing requirements that would have tied up my in house team much longer than I could afford. Integration with our workflow has been painless and quite successful.
Describe their project management style, including communication tools and timelines.
ADCI communicates with us primarily through Redmine, and open source project management tool. This has been fine for us. We're 12 hours off in terms of time zones, but that hasn't been a problem. They've always met their commitments to timely delivery as well.
What did you find most impressive or unique about this company?
Their deep knowledge of the technologies we work with is primary. Also nice are their flexibility and ability to grasp requirements accurately. Finally, they are pleasant to work with, and seem like genuinely good people.

RESULTS & FEEDBACK
Can you share any measurable outcomes of the project or general feedback about the deliverables?
We were able to present a proof of concept to our CEO who has decided to greenlight some of the features to integrate into another team's existing platform. While the project is no longer being developed it served its purpose of devoting an exploratory committee for product-market fit in this new niche.
Describe their project management style, including communication tools and timelines.
We used Redmine and JIRA as our project management tools. The team from ADCI was professional and kept a good pace of development to meet our timelines.
What did you find most impressive or unique about this company?
The team at ADCI was patient and had a great sense of humor to work with our tech lead. Despite setbacks and uncertainty from our end, we worked together well.

adci. ADCI SOLUTIONS

THE PROJECT

Web Dev for Children's Medical Center

Web Development

Confidential

May 2016 - Ongoing

Project summary:

ADCI Solutions initially improved the clinic group's website, working on security updates and migrating to a newer platform. Besides the redesign, they added a personal cabinet and an online appointment form.

THE REVIEW

"It is nice to see that their work brings real results in the form of appointments and new clients."

MAY 28, 2020

5.0

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Willing to refer: 5.0

Feedback summary:

ADCI Solutions continues to support the site to date and have expanded their work into creating seasonal banners and content for email lists. Monthly online appointment bookings jumped from about 200–1,600 with similar growth in users. The team is transparent and delivers tangible success.

RESULTS & FEEDBACK

Can you share any information that demonstrates the impact that this project has had on your business?

Recently, a marketer from ADCI wrote an extensive review of our work, including the following statistics:

1. The average monthly number of appointments through the site increased from 193 to 1623
2. The number of active users, who visited the site once or more during the year, increased from 10,500 to 19,300.
3. The total number of users increased from 28,600 to 45,000.

How was project management arranged and how effective was it?

All tasks are assigned in Redmine, so it's more convenient to track progress for each task. Artem, Project Team Leader, is always in touch. I can say the same about the designer.

What did you find most impressive about this company?

Speed of reaction and professionalism. It is nice to see that their work brings real results in the form of appointments and new clients.

Are there any areas for improvement?

Not that I can think of.

RESULTS & FEEDBACK
Can you share any information that demonstrates the impact that this project has had on your business?
ADCI is our main developer (contractor). We are a very small startup team, and we now outsource all our Drupal/web tasks to ADCI.
How was project management arranged and how effective was it?
ADCI's project management is impressive. Any delays (which are quire rare) are always written clearly. Everybody we have interacted with has used perfect English. We mostly communicate through Asana for tasks (and use Slack). The time difference is noticed (normal business hours, Russia timezone), but it is not a hindrance.
What did you find most impressive about this company?
I am most impressed by the professionalism in terms of the speed and thoroughness in which tasks are done and the manner in which it's all communicated. I have great confidence and trust in the team at ADCI.
Are there any areas for improvement?
I struggle to think of a way ADCI could improve. Anything I could list here would be purely selfish and not something that is worth changing for a "slight preference" of ours.

RESULTS & FEEDBACK

What evidence can you share that demonstrates the impact of the engagement?

I can only answer generally, but ADCI Solutions has improved our online visibility without me needing to bother about it. Since they take care of my website, I can focus on the actual business of my company.

How did ADCI Solutions perform from a project management standpoint?

They're responsive, usually getting back to me and fixing problems within a day. Their CEO is responsive as well—he seems to work 24 hours a day to take care of everything. If I ever needed to escalate something, I'd feel comfortable reaching out to him.

I issue tickets over Basecamp and use it for general communication. In most cases, they solve issues independently, without much communication required.

What did you find most impressive about them?

I'm impressed with their responsiveness and independence in solving issues. I have nothing to complain about, which is why we're still working together.

RESULTS & FEEDBACK
Can you share any information that demonstrates the impact that this project has had on your business?
They created the solution and then clearly demonstrated to us, using various tools, exactly how the platform will improve after their updates. For example, its speed will increase by a factor of 1.5. Due to their competitive rate, the cost of it has actually decreased for us too.
How was project management arranged and how effective was it?
As we expected, ADCI is performing well. The response time is impressive, and they're quite fast at solving any issue we give them. We use Skype for communication and Basecamp for the issues. The time difference between our teams is four hours, but we don't find it problematic due to their good response time.
What did you find most impressive about this company?
They have a very strong knowledge of Drupal. All their interactions with me are professional, which makes the job quite enjoyable. Their quality-price ratio is also impressive.
Are there any areas for improvement?
Everything is good so far. After we complete the fixes and updates, I would like to see how good their advice is, in terms of the improvements to the tool.

RESULTS & FEEDBACK
What can you share that would illustrate the success of working together?
The turnaround time for deliverables and bug fixes was always faster than expected, especially compared to some of the other outsourcing companies we've used previously. Unlike the vendor that we used immediately before them, ADCI actually takes the time to listen to us and answer our questions in terms we can understand. More importantly, when they fix something or propose a solution to a problem we're facing, it's always permanent; whereas with our other vendors, the things would never really be solved.
How is your engagement supervised?
We used JIRA with them. Basecamp was our original tool but once we began including them in more important work, we moved to JIRA. That was an excellent decision because now we have more visibility into our workflow and how things are progressing. They've been more than happy to work openly with us, which wasn't necessarily expected because such close collaboration and transparency can be a point of argument for other vendors.
What do you consider most impressive about ADCI Solutions?
They have extremely talented people on their team; you can tell they really invest a lot in everyone they hire. Having worked pretty closely with them, I can tell they love what they do and that passion definitely translated into better work. Another major strength is their expertise in Drupal, which is a big factor for us since several client projects involve Drupal sites.

RESULTS & FEEDBACK

Could you share any evidence that would demonstrate the productivity, quality of work, or the impact of the engagement?

ADCI Solutions successfully developed a blog and video section for our main company website, as well as introducing various important improvements to our company customer relationship management system.

How did ADCI Solutions perform in terms of project management?

Very well. They are always very engaged with us and are happy to provide regular reports on progress and expenditure. We have access to more senior resources as needed and are always able to escalate issues to the owner if required.

What did you find most impressive about ADCI Solutions?

Having visited their office in Omsk late in 2016, I was extremely impressed with their working environment and professionalism of all of their staff. They are clearly dedicated to maintaining long-lasting and successful relationships with their clients.

Are there any areas where ADCI Solutions could improve?

Not that I can think of at the moment.

RESULTS & FEEDBACK
Could you share any evidence that would demonstrate the productivity, quality of work, or the impact of the engagement?
The real estate website is performing well right now and the customer is happy with the results. We have been happy with everything ADCI has done. In some instances, we don't divulge the fact that we outsource the work. However, we do open the discussion and let ADCI talk directly with some of our customers.
How did ADCI perform from a project management standpoint?
I handle the project management on our side. The system has worked well, although I don't know exactly how ADCI manages the work. We use Jira and Basecamp for logging tasks. I can enter anything into the platforms in English and ADCI will write to me when it's done. We also communicate using Slack and Skype. On a more technically complex project, we've started using Scrum methodology, which will be a new experience for them. ADCI has delivered deadlines well, only barely missing 1 when they encountered a problem. I know that ADCI has a big team, but I've always kept in touch with the same person so I haven't had to explain anything twice. Not everyone in their company speaks English well, but our points of contact do.
What did you find most impressive about ADCI?
Even though there is a 5-hour time difference between our offices, ADCI was able to reply to us when we had emergencies during the evening.
