Upgrade planning check-list

We are glad that you treat your website with care. The best developers of the ADCI Solutions company have prepared this PDF for you. With its help, you can find out what and how often you need to check and update. Save it in your workplace or near.

Don't memorize, but keep in a visible place:

- [ ] Once a month on the first Wednesday of the month - update of the minor version of Drupal with fixed bugs. It may happen more often, it depends on the severity of the bugs.
- [ ] Once a month on the third Wednesday of the month - check security releases in modules supported by the Drupal Community.
- [ ] Once a month and every time within 2 days after deployment - track errors through Google Analytics.
- [ ] Once in 3 months - SEO.
- [ ] Once in 3-6 months - check compliance with the principles of accessibility.
- [ ] Once in 5-6 months - Google PageSpeed Insights optimization.
- [ ] Once in 6 months - update the Drupal minor version.
- [ ] Once in 6 months - refactor front end.
- [ ] Once a year - update PHP.
